Revealed to the world in 1948, the Land-Rover not only revived the Rover Company's fortunes in an austerity-riddled post-war period, but galvanized its future, thanks to the model's almost immediate success. With the manufacture of an initial 48 'pre-production' examples coming to a close, the first official production models were assembled - starting with chassis 860001. As original factory records prove, this pivotal vehicle was destined for His Royal Highness King George VI, but the decision was made to postpone the presentation and instead, 'number one' was retained by the factory until 1950, when it was registered JUE 477 before leaving Rover Company ownership. After decades left out in the cold and exposed to the elements, 860001 had certainly seen better days, but thanks to the determination of Sir Jim Ratcliffe, founder and Chairman of INEOS, the future of JUE 477 was secured in 2017. Over the next two years, a dedicated team of experts, led by chief restorer, Julian Shoolheifer set about restoring the vehicle while retaining as much of its original DNA as was physically, and safely, possible and making sure that this remarkable vehicle's history and past life was still worn with pride. Why Not? After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film. Land Rover, the world's most successful off-road marque, was introduced in 1948 for the toughest of conditions. Today, the family includes the sophisticated Range Rover, Discovery and Freelander, as well as the rugged Defender. Sunday Times Bestseller As quintessentially British as a plate of fish and chips or a British Bulldog, the boxy, utilitarian Land Rover Defender has become an iconic part of what it is to be British. After ten years of production, the Solihull-manufactured Land Rover was established as a useful 4x4, popular with farmers, armies, and those whose employment took them far from the beaten track. Following a redesign, the Series II Land Rover was launched in April 1958. It was available in two wheelbases, with a choice of diesel or petrol engines and a variety of body styles including pick-ups and soft-tops and, aimed more at travel and people-carrying rather than agricultural work, short and long wheelbase Station Wagons. The main difference that identified the new Land Rovers at a glance was the radius pressed into the aluminium bodywork below the galvanized waist rail. This changed the Land Rover's appearance considerably and was a shape that endured until 2016 in the Land Rover Defender. The Series IIA was introduced in 1961 and through a production run that lasted until 1971, a succession of upgrades, mainly detail and cosmetic changes, followed. The distinctive Station Wagon models - unofficially referred to as 'Safari' models - became popular with overland travelers and were often seen on location in TV nature programs, in National Geographic magazine and in the hands of aid agencies all of which promoted the Land Rover, which had most of the market to itself, especially in export markets such as Australasia and Africa.
