In the summer of 2005, Pennsylvania state government revealed its seedy underbelly when the General Assembly gave itself and others an unconstitutional middle-of-the-night pay raise. In response, the people of the Commonwealth awoke from a long slumber and rose up in defiance of the Political Class. They made history - and the reverberations are still being felt. Things may never be the same again in the Keystone State. Beneath the battles of right versus left, liberal versus conservative and Republican versus Democrat, the Establishment strained to maintain power and continuity. Traditional political ideologies took a back seat as the very fabric of the Political Class was torn apart. In 2005-2006, Pennsylvanians got a taste of what happens when the ivory-towered crowd is running scared. But what we read in the papers and see on television is never the whole story. Cadillac has had a long history in the automotive marketplace as General Motors' luxury car division. During the 1980s, Cadillac's management wanted to reestablish the brand as a leader in sophistication, innovation, refinement and prestige. Engineers conceived a new dual-overhead cam, four-valve-per-cylinder V-8 engine—the Northstar. This power plant was the heart of Cadillac's Northstar System, which included a greatly improved suspension and braking system. The division redesigned its entire line to incorporate these new technologies for the 1990s and beyond. The Northstar was the last engine designed and built by Cadillac before the 2005 establishment of GM Powertrain, which took over engine design for all GM divisions. This history of the Northstar V-8 and the cars it powered covers the first generation front-wheel drive Northstar, the second generation rear-wheel drive model, and the supercharged version, along with racing history and the most collectible Northstar-powered Cadillacs.
