Which Book and Why Jun 30 2020 We want all children to love reading, and *Which Book and Why* demonstrates how effective guided reading for children in Foundation Stage and Key Stage 1 can help teachers make this happen. Balancing theory and practice, this book explores how schools and teachers can implement guided reading more confidently and more effectively. *Which Book and Why* draws together the teaching pedagogy underpinning guided reading. The book demonstrates how to develop word-reading skills, reading for meaning, and reading for information. Building on the success and strong foundations of *Book Bands for Guided Reading* (Baker, Bickler and Bodman, 2007), *Which Book and Why*:

- supports the effective delivery of guided reading for young children in the early stages of learning to read;
- helps teachers to choose the right book at the right time, based on focused assessments;
- explains how guided reading fits with current theoretical understanding of how children learn;
- demonstrates how guided reading works in practice;
- outlines how practice may vary, depending on the choice of text, teaching objectives, and the needs of the child;
- provides guidance for school subject leaders and senior managers, and for teachers' self-study.

Which Book and Why includes in the accompanying CD-ROM a fully searchable database to support schools and teachers in choosing the most appropriate books at the right level for each group in a class. The database includes a full listing of colour-banded titles, including those from recently published series, allowing teachers to use their existing libraries more effectively while also informing decision-making about new resources. In parallel, teachers can search the database for texts that will complement the teaching progression of mainstream phonic programmes, review programmes that are available, and search for a text to consolidate teaching of particular phonemes. *Which Book and Why* offers professional development resources in each section; self-study activities for teachers – including student teachers, newly qualified teachers, and staff new to guided reading; resources for literacy subject coordinators; and resources for senior management and leadership teams to support the implementation of high-quality and effective guided

reading lessons.

Guided Reading Feb 25 2020 In an era of change in education, the time is right to refocus attention on guided reading practices. Guided reading remains an anchor in classroom literacy programs, but how has it changed with the new shifts in education? In this book, Dr. Michael P. Ford provides a practical resource for guided reading. He explains how it evolved, why it's still important, how to fit it into a comprehensive literacy program, how to select texts, how to assess and support students, and how to position it for intervention. Also included is an Appendix with a listing of recommended guided reading books.

The Writing Revolution Jul 24 2022 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.
