The 30 Day MBA in Business Finance provides a complete 'course' in business finance, covering 13 key topics which fall under three main headings - the Fundamentals of Business Finance, Corporate Capital Structures and Financial Strategies and Special Topics. Learn what they teach you at the world's top accountancy firms and Business Schools and why it matters to you. With guidance on understanding financial reports, assessing the credit worthiness of business partners, determining profitable strategies, raising finance and ensuring proper records, this book contains everything you need to eliminate gaps in your financial knowledge, think like a financial strategist and become a top manager. Readers will discover how very recent scientific advances have overthrown a century of dogma about concussive brain injury. The fast pace of technology in this day and age has made it difficult for individuals to stay informed without becoming lost in the folds of an information overload. Methods used to narrow down information are becoming just as important as providing the information to be discovered. The Handbook of Research on Multidisciplinary Approaches to Literacy in the Digital Age is a pivotal reference source that provides vital research on the significance of being literate in the age of speed and technology. While highlighting topics such as e-advertising, mobile computing, and visual culture, this publication explores the major issues society has in the information age and the methods of innovative achievements of public or private institutions. This book is ideally designed for researchers, academicians, teachers, and business managers seeking current research on a variety of social sciences in terms of the digital age. International Standard Banking Practice (ISBP) for the examination of documents under documentary credits, answers the most relevant questions practitioners have concerning how UCP 500, ICC's universally used rules on documentary credits, are to be integrated into day-to-day practice. The product of more than two years of work by the ICC Banking Commission, ISBP is based on the official Opinions issued by the Banking Commission in response to queries submitted by users of UCP 500. The text provides responses to the key questions relating to the examination of drafts, multimodal transport documents, insurance documents, certificates of origin and a range of other documents associates with letters of credit. This publication reflects international standard banking practice for all parties to a documentary credit. Figures show that 60%-70% of credits are rejected for discrepancies on first presentation. The new ISBP, by encouraging a uniformity of practice worldwide, is expected to cut these figures dramatically and, by doing so, to facilitate the flow of world trade. "These guidelines have been written for public health practitioners, food and health inspectors, district and national medical officers, laboratory personnel and others who may undertake or participate in the investigation and control of foodborne disease outbreaks."--P. 4 of cover. "Businesses across all sectors now realize that, if they intend on staying competitive in the 21st century, then they must embrace new innovative technologies such as AI, automation and digital platforms. But many business leaders have become too focused upon digital transformation, leading them to neglect other vital elements of their organization. Built upon fascinating research and an international array of case studies, People Before Tech is an incisive examination of how organizations--through their digital transformations--become stranded with optimized teams and disenfranchised employees"-- If you think that the rules of the International Chamber of Commerce (ICC), Paris on trade finance and documentary credits have no surprises left for you, then read this book very carefully from cover to cover. Whether you are a trade finance veteran or a recent entrant, the articles in this book will provide you with a few unconventional and unusual perspectives about the UCP and the ISBP rules. The book discusses selected provisions of UCP 600, and also raises several pertinent questions. For example, does the SWIFT MT700 really provide for an expiry date? Is article 15 necessary? Why shouldn't UCP sub-article 16(f) apply to a nominated bank? Did you know that UCP article 10 on amendments has a huge logical error? Why are some critical rules missing in the UCP (they are only in the ISBP)? Are you aware that sub-articles 14(g), and 14(h) on non-documentary conditions, are both incorrectly structured? Which ICC 'rules' apply if a presentation contains only copies of transport documents? Must a B/L or a MMTD show a date of issue? What is 'negotiation'? Why is the place where a credit is available of critical importance to an exporter/beneficiary? Go ahead and read the book. It will provide you with plenty of food for thought, a deeper understanding of the rules of trade finance, and value for money. "Swimming against the tide" is the true story of a sports person who challenges her circumstances and physical disability to overcome the odds and emerge a winner, along the way becoming an inspiration to many. The use of ICT applications has dipped into almost every aspect of the business sector, including trade. With the volume of e-commerce increasing, international traders must switch their rules and practices to e-trade to survive in such a competitive market. However, the complexity of international trade, which covers customs processes, different legislation, specific documentation requirements, different languages, different currencies, and different payment systems and risk, presents its own challenges in this transition. Tools and Techniques for Implementing International E-Trading Tactics for Competitive Advantage examines the multidisciplinary approach of international e-trade as it applies to information technology, digital marketing, digital communication, online reputation management, and different legislation and risks. The content within this publication examines digital advertising, consumer behavior, and e-commerce and is designed for international traders, entrepreneurs, business professionals, researchers, academicians, and students. The Council of Europe Committee of Ministers' Recommendation Rec(2007)8 on legal solutions to debt problems is the first international legal instrument that establishes a set of legal principles in order to assist national legislators

in introducing or reinforcing laws and policies in this field. The recommendation covers three main areas: prevention of over-indebtedness of individuals and families, alleviation of the effects of debt recovery in order to avoid social exclusion and rehabilitation of over-indebted individuals with due regard to their human dignity. Praise for Directory of Global Professional Accounting and Business Certifications "In a globalized world, employers are confronted by a bewildering variety of professional qualifications, some valid, some less weighty and some spurious and fraudulent. This excellent compilation enables the reader to touch base with such organizations and explore their true credentials through access to their whereabouts including Web sites. As we look to instant answers to everything from love to parenting, here is a book that tells us of love, perseverance & dedication. These are universal feelings all can empathise. Special children are special because they show you a life made of humane abilities. A must read for anyone who wants to be inspired by a person & his whole support system of family and friends that overcame & not overwhelmed at some of life's tough questions. As parents we set expectations at every milestone. Here is a parent who left no stone unturned to ensure Sid go that extra mile. Sid's mom Komala has truly shown what strong belief and hope can do in a child's life My deepest appreciation Viswanathan Anand World Chess Player "My concept of patience is remembering how my mom had to wait nine years to see me go to school, and another ten years to see me become a little independent and then ten more to become fully independent!"-- Siddharth Letters of Credit: Theory and Practice explains in simple English all the important information you'll ever need on letters of credit (LC). This book provides extensive, easy-to-understand, practical and useful suggestions to help during negotiations, in selecting the right terms of payment, improving operations, reducing errors and risks, facilitating trade and final settlement, and much more. It is extensively researched, delving deep into the subject of international trade, presenting current issues and solutions related to LCs that the reader may not otherwise come across easily. A gold mine of information on payment risk management, it's the last word on documentary credits. "This book is a great read for knowledge and practical information on letters of credit. It succinctly takes the reader through the concepts of risk management, explains the fundamentals of global trade finance issues, the dilemmas plaguing international sellers and buyers, and standardised ways for the buyer and the seller to secure goods and make payments, respectively. This is a must-read book for academicians, exporters, importers and bankers looking for complete, authentic information on international trade finance and global business." - Dr. Deepankar Sinha, Professor; Head - Research Division, Kolkata Campus; Programme Director - Centre for Trade and Logistics (CTFL), Kolkata Campus, Indian Institute of Foreign Trade (IIFT) The 2014-2015 Ebola epidemic in western Africa was the longest and most deadly Ebola epidemic in history, resulting in 28,616 cases and 11,310 deaths in Guinea, Liberia, and Sierra Leone. The Ebola virus has been known since 1976, when two separate outbreaks were identified in the Democratic Republic of Congo (then Zaire) and South Sudan (then Sudan). However, because all Ebola outbreaks prior to that in West Africa in 2014-2015 were relatively isolated and of short duration, little was known about how to best manage patients to improve survival, and there were no approved therapeutics or vaccines. When the World Health Organization declared the 2014-2015 epidemic a public health emergency of international concern in August 2014, several teams began conducting formal clinical trials in the Ebola affected countries during the outbreak. Integrating Clinical Research into Epidemic Response: The Ebola Experience assesses the value of the clinical trials held during the 2014-2015 epidemic and makes recommendations about how the conduct of trials could be improved in the context of a future international emerging or re-emerging infectious disease events. Economic growth is a key issue both in economic policy making and in economic research. In eastern nations of the world, the interest in economic growth has been in the centre stage in view of the persistently high rates of unemployment and resurgence of recessionary pressures on these economies due to spillover effects from other developed economies undergoing recessionary phases. Entrepreneurial activities not only open up new doorways of income generation for individuals residing in the economy but is also looked upon now as panacea to treat unemployment by most governments, provided such ventures turn out to be revenue generating for the entrepreneur after all the risk he is willing to undertake. Entrepreneurship contributes to the development of innovative technologies, processes as well as business systems which in turn influences the prevailing market structures in the economy disrupting the competition existing in the markets. Nonetheless it bound to impact the capital formation in the economy and thus the growth of the economy. The inter relations between credit extension by commercial banks, entrepreneurship and economic growth are investigated in this paper empirically using autoregressive models. This book explains 38 key documentary credit concepts in a clear and simple manner. But not only that; also taking it out of its context so that one can approach one concept when it is appropriate. The idea is to describe each of these concepts as short as possible (and present them in alphabetic order) and primarily from the perspective of the documentary credit. Many countries are seeking to reach an effective universal health coverage system to increase the quality of life of their citizens. By implementing universal health coverage, countries can support all citizens, including those who do not have the financial power to pay for healthcare services, in receiving the necessary medical treatment to enable them to live healthier lives. Multidimensional Perspectives and Global Analysis of Universal Health Coverage is an essential reference source that defines the significance of universal health coverage and studies multiple concepts related to universal health coverage that can support qualified recommendations for governments seeking to improve their healthcare situation. Featuring research on topics such as financial risk, organizational performance, and patient safety, this book is ideally designed for policymakers, hospital executives, government officials, lawmakers, politicians, academicians, students, and researchers. The vast majority of international trade is supported by some form of trade financing: a specialized, sometimes complex form of financing that is poorly understood even by bankers and seasoned finance and treasury experts. Financing Trade and International Supply Chains takes the mystery out of trade and supply chain finance, providing a practical, straightforward overview of a discipline that is fundamental to the successful conduct of trade: trade that contributes to the creation of economic value, poverty reduction and international development, while increasing prosperity across the globe. The book suggests that every trade or supply chain finance solution, no matter how elaborate, addresses some combination of four elements: facilitation of secure and timely payment, effective mitigation of risk, provision of financing and liquidity, and facilitation of transactional and financial information flow. The book includes observations on the effective use of traditional mechanisms such as Documentary Letters of Credit, as well as an overview of emerging supply chain finance solutions and programs, critical to the financing of strategic suppliers and other members of complex supply chain ecosystems. The important role of export credit agencies and international financial institutions is explored, and innovations such as the Bank Payment Obligation are addressed in detail. Financing Trade and International Supply Chains is a valuable resource for practitioners, business executives, entrepreneurs and others involved in international commerce and trade. This book balances concept with practical insight, and can help protect the financial interests of companies pursuing opportunity in international markets. The book elucidates the importance of a letter of credit in matters of trade finance. A letter of credit is an instrument that is used worldwide to facilitate the flow of trade finance. This book is ideal for beginners who are interested in the subject but do not possess a clear understanding of the basics of the letter of credit or adequate technical knowledge. It may also benefit bankers and students of international trade finance. It will help them build a strong foundation to help understand how to tackle difficult day to day transactions. The book explains the UCP 600 guidelines that govern letters of credit and the roles of the issuing bank, beneficiary, advising bank, nominated bank, confirming bank, applicant and so on. This book is not exhaustive as letter of credit is a vast subject and every single transaction carried out is unique. The book has been written keeping in mind the difficulties I faced while working at a bank and the experiences I have gained thus far, on my journey as a trade finance professional. PRAISE FOR Banking on Change "In this 140th Anniversary celebration book, The London Institute of Banking and Finance stick to their core function of educating us all, but especially aspirant bankers, on the role and concerns of (retail and commercial) banking in the UK. They have assembled a well-chosen group of practitioners from a range of professions to write clear and easily assimilable essays, no technical expertise required, on a wide variety of current banking issues. If you want to learn about the current practices and problems of UK retail banking, this book must be essential reading." —Charles Goodhart, emeritus professor of banking and finance at the London School of Economics "In this important book, a line from Bill Allen's contribution is key: 'Nobody can predict the ferocity of the gale of creative destruction' that faces the financial services sector. True; but if you read the many and varied contributions, you'll have a pretty good idea. Moreover, you'll understand how we (that is, bankers) got here – and what we should do to make the industry more competitive, fairer and more genuinely useful. It is a soup-to-nuts look at banking – from the early days of the Institute of Banking, through the go-go years of ifs, to a present and future that are likely to be dominated by technology. It is well-worth a long read." —Andrew Hilton, director, Centre for the Study of Financial Innovation "If you were to imagine what a book celebrating 140 years of financial knowledge might contain, you could not come up with a better selection than this. As well as a historic sweep – from no-tech to fintech, the decline of trust and the rise of competition – today's hot subjects are addressed, including sustainable investing, cultural diversity and digital identity. The cradle-to-grave nature of the industry is captured in pieces about financial education and pensions. And it's well written, setting the scene nicely for the next era." —Jane Fuller, Fellow of the Society of Investment Professionals Financial services are undergoing rapid, and potentially dramatic, change. What will happen in payments, in sustainable finance and in fintech? How can the industry boost financial inclusion and ensure that its workforce has the skills it needs to meet regulatory requirements and to compete with new entrants? Can trade finance rise to the challenge of underpinning global trade for all and help the developing world avoid "financial abandonment"? What do financial services need to do to protect our digital identities? Banking on Change provides insights by experts and influencers from across the financial services industry on these and other questions. Published to mark the 140th anniversary of The London Institute of Banking & Finance, this book is intended to be of lasting value to both students and professionals. UP. Trade has always been shaped by technological innovation. In recent times, a new technology, Blockchain, has been greeted by many as the next big game-changer. Can Blockchain revolutionize international trade? This publication seeks to demystify the Blockchain phenomenon by providing a basic explanation of the technology. It analyses the relevance of this technology for international trade by reviewing how it is currently used or can be used in the various areas covered by WTO rules. In doing so, it provides an insight into

the extent to which this technology could affect cross-border trade in goods and services, and intellectual property rights. It discusses the potential of Blockchain for reducing trade costs and enhancing supply chain transparency as well as the opportunities it provides for small-scale producers and companies. Finally, it reviews various challenges that must be addressed before the technology can be used on a wide scale and have a significant impact on international trade. The field of professional, academic and vocational qualifications is ever-changing. The new edition of this highly successful and practical guide provides thorough information on all developments. Fully indexed, it includes details on all university awards and over 200 career fields, their professional and accrediting bodies, levels of membership and qualifications. It acts as an one-stop guide for careers advisors, students and parents, and will also enable human resource managers to verify the qualifications of potential employees. A novel coronavirus outbreak was first documented in Wuhan, Hubei Province, China in December 2019, and has since spread globally, resulting in the 2019 - 2020 coronavirus pandemic. This book answers and offer guidance to most of the Trade Finance questions and issues raised during the covid-19 crisis. In response to the many Trade Finance questions relating to the covid-19 crisis, Kim Sindberg started publishing a series of lcviews blog posts under the segment CoronAdvice. Between the blog posts, Kim Sindberg decided to collect them as well as some of the articles published in the LCM Newsletter and include them into this book. Of course, this book also contains previously unpublished material, just as there are 2 guest chapters written by A.T.M. Nesarul Hoque and Vinod Elambilan Padinhere. Although the chapters in this book focus on covid-19 issues, the information apply equally to other situations; whether or not there is an ongoing pandemic. As a result, this book provides an overview of the covid-19 crisis from a Trade Finance perspective. Can Community Development Financial Institutions (CDFIs) get unlimited amounts of low cost, unsecured, short- and long-term funding from the capital markets based on their organizational credit risk? Can they get pricing, flexibility, and procedural parity with for-profit corporations of equivalent credit risk? One of the key objectives of this book is to explain the reasons why the answer to the two questions above remains "no." The other two key objectives are to show the inner workings of what has been done to date to overcome the obstacles so that we don't have to retrace the same steps and recommend additional disciplines that position CDFIs to take advantage of the mechanisms of the capital markets once the markets stabilize.
