An anthology of illustrated narratives about the prison and the lives it changed forever. In January 2002, the United States sent a group of Muslim men they suspected of terrorism to a prison in Guantánamo Bay. They were the first of roughly 780 prisoners who would be held there—and forty inmates still remain. Eighteen years later, very few of them have been ever charged with a crime. In Guantánamo Voices, journalist Sarah Mirk and her team of diverse, talented graphic novel artists tell the stories of ten people whose lives have been shaped and affected by the prison, including former prisoners, lawyers, social workers, and service members. This collection of illustrated interviews explores the history of Guantánamo and the world post-9/11, presenting this complicated partisan issue through a new lens. “These stories are shocking, essential, haunting, thought-provoking. This book should be required reading for all earthlings.” —The Iowa Review “This anthology disturbs and illuminates in equal measure.” —Publishers Weekly “Editor Mirk presents an extraordinary chronicle of the notorious prison, featuring first-person accounts by prisoners, guards, and other constituents that demonstrate the facility’s cruel reputation. . . . After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago. With the dramatic increase in RNA 3D structure determination in recent years, we now know that RNA molecules are highly structured. Moreover, knowledge of RNA 3D structures has proven crucial for understanding in atomic detail how they carry out their biological functions. Because of the huge number of potentially important RNA molecules in biology, many more than can be studied experimentally, we need theoretical approaches for predicting 3D structures on the basis of sequences alone. This volume provides a comprehensive overview of current progress in the field by leading practitioners employing a variety of methods to model RNA 3D structures by homology, by fragment assembly, and by de novo energy and knowledge-based approaches. In recent decades, governments have promoted social enterprise as a means to address welfare and tackle disadvantage. Early academic work on social enterprises reflected this development and engaged with their ability to deliver and create jobs, work towards remedial environmental goals, and address a range of societal challenges. More recently, researchers have started to investigate the broader potential of social enterprise for the wellbeing of people and the planet. In this context, this book aims to answer the question: In what ways can social enterprises improve the health and wellbeing of individuals and communities? The chapters in this edited collection take different perspectives on assessing how social enterprises address disadvantage and deliver health and wellbeing impacts. Drawing on evidence from international research studies, *Social Enterprise, Health, and Wellbeing: Theory, Methods, and Practice* presents the 'first wave' of innovative research on this topic and provides a platform of evidence to inspire the next generation of scholarly and policy interest. Drawing on the cutting edge of interdisciplinary research in the field, this book will be of interest to researchers, academics, policymakers, and students in the fields of entrepreneurship, public and social policy, community development, public health, human geography, and urban planning. Most of us have also felt as if we've failed at times, as well. But what is the difference between those who succeed and those who fail? The answer is simple: attitude. In this practical and empowering new book, Dr. Robert H. Schuller, the host and master of possibilities of the weekly telecast *The Hour Of Power* shows how to overcome the fear—and the groundless excuses—that keep us from success, fulfillment, and happiness. Here Dr. Schuller reveals his own unique formula for never-ending success: • The 10 steps for tuning your dreams into reality • The amazing power of possibility thinking • The 22 stops on the road map to success • The 4 Cs of "success thinking" • How to banish "impossibility thinking" from your life • The "miracle ingredients" of faith and hope . . . and much more Your dreams, Dr. Schuller tells us, no matter how impossible, are the seeds of your success! Now you can learn how to nurture and cultivate your possibilities, uproot the negatives, and watch your dreams blossom into reality. "This book is organized around three concepts fundamental to OS construction: virtualization (of CPU and memory), concurrency (locks and condition variables), and persistence (disks, RAIDS, and file systems"--Back cover. In the fourteen years of NDTV's *Walk The Talk* Shekhar Gupta has interviewed more than 600 stellar guests—an outstanding feature for one of Indian TV news channel's most respected shows is the wide diversity of its guests. These range from heads of states to national, regional and international politicians and public figures, from Indian and global film stars to Nobel Laureates, scientists, economists, sports stars (not limited to cricket), spiritual gurus, business tycoons, philanthropists and, of course, activists. This book focuses exclusively on political leaders and public figures. Many of these conversations are path-breaking, and some extremely rare. For example, leaders like Sonia Gandhi and former prime minister P.V. Narasimha Rao have never before engaged in freewheeling, recorded conversations in such detail. Others have broken new ground since Narendra Modi, L.K. Advani, Pranab Mukherjee, Mayawati and even M. Karunanidhi. There are also global thought leaders and heads of state: David Cameron, Henry Kissinger, and Pushp Kamal Dahal 'Prachanda', among others. There is also the rarest of rare interviews with the former RSS chief K.S. Sudarshan. It was challenging to choose just twenty-five political personalities and voices to feature in this selection. And one criterion has been to try and pick those conversations that mark political shifts and change. Hopefully, these will help provide an understanding of recent political history, and how we have reached the point we are at today, in the words of these very significant and interesting people. his book has been prepared with the aim to present the application of these two state-of-the art
