*War: How Conflict Shaped Us* Mar 12 2021 NATIONAL BESTSELLER SHORTLISTED for the 2021 Lionel Gelber Prize Thoughtful and brilliant insights into the very nature of war--from the ancient Greeks to modern times--from world-renowned historian Margaret MacMillan. War--its imprint in our lives and our memories--is all around us, from the metaphors we use to the names on our maps. As books, movies, and television series show, we are drawn to the history and depiction of war. Yet we nevertheless like to think of war as an aberration, as the breakdown of the normal state of peace. This is comforting but wrong. War is woven into the fabric of human civilization. In this sweeping new book, international bestselling author and historian Margaret MacMillan analyzes the tangled history of war and society and our complicated feelings towards it and towards those who fight. It explores the ways in which changes in society have affected the nature of war and how in turn wars have changed the societies that fight them, including the ways in which women have been both participants in and the objects of war. MacMillan's new book contains many revelations, such as war has often been good for science and innovation and in the 20th century it did much for the position of women in many societies. But throughout, it forces the reader to reflect on the ways in which war is so intertwined with society, and the myriad reasons we fight.

IMF Staff Papers, Volume 55, No. 1 Jan 22 2022 In this issue, a team of economists look at approaches to modeling the use of IMF resources in order to gauge whether the recent decline in credit outstanding is a temporary or permanent phenomenon. Era Dabla-Norris and Gabriela Inchauste examine what drives the growth of firms, with a focus on informality and regulations. Evan Tanner and Issouf Samake use a vector autoregression approach to examine the probabilistic sustainability of public debt in Brazil, Mexico, and Turkey. And Rachel Glennerster and Yongseok Shin ask whether transparency pays?that is, does the frequency and accuracy of macroeconomic information released to the public lead to lower borrowing costs in sovereign debt markets?

*Benefiting from Basic Education, School Quality and Functional Literacy in Kenya* Dec 21 2021 Studies of the retention of literacy and numeracy by adults who have only obtained primary schooling have given little encouragement to the belief that the cognitive effects of schooling are enduring for many school leavers. How these findings can be reconciled with the claims made for the importance of schooling as an instrument of social and economic change is the subject of investigation in this volume. The cognitive outcomes of literacy acquisition and secular schools in coastal Kenya are the focus of this ethnographic study, which stresses the relevance of an international understanding of the particular problems and dilemmas that face the educational systems of individual countries.

Ice, Mud and Blood Oct 19 2021 Imagine a world of wildly escalating temperatures, apocalyptic flooding, devastating storms and catastrophic sea levels. This might sound like a prediction for the future or the storyline of a new Hollywood blockbuster but it's actually what occurred on earth in the past. In a day and age when worrying forecasts for future climate change are the norm, it seems hard to believe that such things happened regularly over time. Can humankind decipher the past and learn from it? As science gains new understanding of how the planet works, it's becoming increasingly clear that no one place is disconnected from anywhere else. From the Alps to the Andes, seemingly unrelated parts of the world are connected in one way or another. By reading this book you'll realize that we're facing challenges beyond anything our species has had to contend with before.

*Different Drummer* Oct 07 2020 Kenneth MacMillan's ballets are in constant demand by world-famous companies, particularly Romeo and Juliet, Manon and Mayerling. However, MacMillan was tormented by an acute sense of being an outsider, and often at odds with the institutions in which he worked. A real-life Billy Elliot from a Scottish working class family, MacMillan demonstrated a prodigious talent for dancing from an early age. Following the premature death of his mother, the young MacMillan sought an escape, and despite his father's disapproval, secured a place at Sadler's Wells. Paradoxically he found himself crippled by stage-fright during the height of his professional career, leaving him with only one option - choreography. He went on to produce ballets which defied convention and became renowned for challenging audiences. Despite criticism, MacMillan achieved international acclaim, becoming artistic director of both the Berlin Ballet and the Royal Ballet. On a personal level he found unexpected happiness with his wife and daughter in the later stages of his life, making it all the more tragic when he died suddenly at the age of 62. This stunning biography reveals a complex artist who fiercely guarded his own privacy, whilst his ballets communicated his darkest and most intimate thoughts.

*IMF Staff Papers, Volume 57, No. 2* May 26 2022 This paper introduces a new database of financial reforms covering 91 economies over 1973-2005. It describes the content of the database, the information sources utilized, and the coding rules used to create an index of financial reform. It also compares the database with other measures of financial liberalization, provides descriptive statistics, and discusses some possible applications. The database provides a multifaceted measure of reform, covering seven aspects of financial sector policy. Along each dimension the database provides a graded (rather than a binary) score, and allows for reversals.
