In 1986, after owning eleven BMWs in three years, Rob Siegel sent an unsolicited article to Roundel, the magazine of the BMW Car Club of America. Little did he know that it would kick off 35 years of do-it-yourself automotive writing, and that his monthly column The Hack Mechanic? would attract a community of like-minded enthusiasts who, like Rob, try to come up with creative workarounds to keep their cars running without taking them to the dealer every time they hiccup. More than just "use 10mm wrench on bolt B" instructions, though, the columns have always been small journeys into passion and problem solving, philosophy lessons disguised as a repair articles, and short stories about getting into and hopefully out of automotive trouble. The Best Of The Hack Mechanic? is a selection of these pieces, including ones on how to buy a vintage BMW and not get burned, the most creative way possible to lock your keys in a running car, why car folks will do just about anything to avoid buying a family minivan when the money obviously would be so much better spent on "something fun," why a car nut really does need seven cars, why the odds of having a car start is often inversely proportion to the number of cars in the driveway, why finding one of his father's tools is enough to make Rob cry, and why working on your car feels so damned good, all written in Rob's Hack Mechanic voice that hovers somewhere between J.D. Salinger, Bill Bryson, and David Sedaris. Informative, irreverent, and poignant, The Best Of The Hack Mechanic? will have you hoping Rob has another 35 years of columns in him. English Studies Online: Programs, Practices, Possibilities represents a collection of essays by established teacher-scholars across English Studies who offer critical commentary on how they have worked to create and sustain high-impact online programs (majors, minors, certificates) and courses in the field. Ultimately, these chapters explore the programs and classroom practices that can help faculty across English Studies to think carefully and critically about the changes that online education affords us, the rich possibilities such courses and programs bring, and some potential problems they can introduce into our department and college ecologies. By highlighting both innovative pedagogies and hybrid methods, the authors in our collection demonstrate how we might engage these changes more productively. Divided into three interrelated conversations — practices, programs, and possibilities — the essays in this collection demonstrate some of the innovative pedagogical work going on in English departments around the United States in order to highlight how both hybrid and fully online programs in English Studies can help us to more meaningfully and purposefully enact the values of a liberal arts education. This collection serves as both a cautionary history of teaching practices and programs that have developed in English Studies and a space to support faculty and administrators in making the case for why and how humanities disciplines can be important contributors to digital teaching and learning.
