Titles included: Marine Safety Manual Volume I: Administration And Management Marine Safety Manual Volume II: Materiel Inspection Marine Safety Manual Volume III: Marine Industry Personnel Instruction on officer safety covers surviving occupational stress, cardiovascular risks, traffic risks, suicide risks, field threats, and wounds and injury. Police job-related risks are in the general categories of disease, accident, suicide, and homicide. Occupational stress can be a contributing factor to death or injury in all these areas, as it undermines physical and mental health as well as alertness and concentration in the performance of field duties. Stress may derive from the nature of the work, community sources, internal departmental operations, the justice system, family relationships, and from the officer's personality. Countering cardiovascular risk involves understanding the risk, dealing with and preventing high blood pressure, watching diet, eliminating smoking, and giving attention to exercise and body composition. Surviving traffic risks involves focusing on routine patrol driving, emergency and pursuit driving, vehicle safety, safety devices, and pedestrian hazards. Countering the risk involves being attentive to the warning signs and undertaking preventive steps. Surviving field threats means being attentive to safety procedures for general patrol duties and those appropriate for specific duties and situations, such as felony carstops, robbery calls, burglary calls and building searches, dealing with deranged persons, ambushes, disturbance calls, and field interviews. Guidelines for surviving wounds and injury are to not panic, stop the bleeding, protect your air, prevent shock, and follow other self-aid principles. Graphic and

The Commission had a strong interest in studying the methods used by the city to balance crime fighting with the exercise of appropriate restraint, particularly following the highly publicized tragedies involving Abner Louima & Amadou Diallo. This report is intended to offer insights into some of the tensions that exist between the New York Police Dept. & the communities that it serves. It will serve as a catalyst for the development of courses as well as growth in the number of qualified volunteer police, a necessary resource for homeland security.
